

Index

- Beltrami flows, 15, 50, 101, 142
 a stretching plate, 17
 asymptotic suction profile, 19
 cat's eye vortices, 104
 flow downstream of a grid, 17
 flow into a corner, 19
 impinging rotational flows, 104
 line source and vortex in a shear flow, 16
 oblique impingement of flows, 16
 opposing rotational streams, 51
 rotational flow against a plane boundary, 51
 shear flow over convection cells, 16
 Taylor vortices, 103
- Ekman flow, 77, 167
- elliptic pipe flow, 50
- impulsive flows, 91
 applied body force, 93
 applied shear stress, 94
 infinite plane set in motion, 91
 superposed on asymptotic flow, 96
 the angled flat plate, 98
- jet flows, 78
 the bounded round jet, 79
 the free round jet, 79
- Navier–Stokes equations, 1, 2
 in Cartesian co-ordinates, 7
 in cylindrical polar co-ordinates, 8
 in spherical polar co-ordinates, 9
 non-parallel boundaries, Jeffery–Hamel flow, 32
- oscillating plate, 90
- parallel boundaries with suction or injection, 28
- pipe and cylinder flows, 45, 128, 130
 annular pressure-driven flow, 46
 flow due to rotating boundaries, 47
 impulsive cylinder flow, 138
 impulsive pipe flow, 128
 periodic pipe flow, 129, 132
 porous pipe, 53
 torsional oscillations, 142
 variable radius pipes, 136
- plane Couette–Poiseuille flow, 11
 rectangular channel, 13
 triangular cross-section, 14
- rotating disks (steady), 68
 a single disk, 69
 two disks, axisymmetric flow, 73
 two disks, eccentric flow, 76
- rotating disks (unsteady), 156
 eccentric/asymmetric flow, 164
 in a counter-rotating fluid, 161
 self-similar solutions, 156
- squeeze flows, 121, 151
 between disks, 152
 in a channel, 121
- stagnation-point flow (non-planar), 53, 142
 against a sliding plane, 53
 classical Homann solution, 53
 effect of unsteady superposed shear on
 Homann flow, 146
 floating disks, 56
 Homann flow against an oscillating plate, 143

- stagnation-point flow (non-planar) (*cont.*)
 - on a circular cylinder, 56, 59, 148
 - rotational onset flow against a plane boundary, 54
- stagnation-point flow (planar), 20, 106
 - at a rear stagnation point, 118
 - classical Hiemenz solution, 20
 - in a cross flow of uniform shear, 23
 - in a liquid film, 21
 - orthogonal boundary oscillations, 109
 - shear flow on impinging stagnation-point flows, 113
 - swept stagnation-point flow, 39
 - three-dimensional flow, 42
 - transverse boundary oscillations, 106
 - two-fluid flows, 26, 27
 - vortices in, 40
 - with a sliding boundary, 21
- stress tensor, 2
- unsteady channel flow, 119
 - between fixed boundaries, 119
 - periodic situations, 124
 - squeeze flows, 121
- unsteady plate stretching, 100
- Vortical flows, 82, 169
 - bounded vortex flow, the work of Serrin, 83
 - Burgers vortex, 82
 - conical vortex flow, 87
 - elongated toroidal vortex, 51
 - influence of boundaries on unsteady vortex flows, 177
 - spherical vortex, 51
 - Sullivan's two-cell vortex, 83
 - unsteady, unbounded multi-cell vortices, 172
 - unsteady, unbounded single-cell vortices, 169
- vorticity, 3, 4
